Maharaja Agrasen Institute of Technology

Maharaja Agrasen Institute of Technology was established in 1999 by Maharaja Agrasen Technical Education Society promoted by a group of well-known Industrialists, Businessmen, Professionals and Philanthropists with an aim to promote quality education in the field of Technology and Management. Since then, MAIT has grown from strength to emerge as one of the top technical institutes among the private Institutes and has been constantly ranked amongst the top engineering Institutes by DATAQUEST.

To build lasting relations with Industry, MAIT joins hands with industry in fulfilling the social responsibility of imparting industry relevant technical education and training. Its Alumni have also distinguished themselves through their achievements in industry, academics, research, business, government and social domains. The institute continues to work closely with the Alumni to enhance its activities through interactions in academic and research program.

About Interaction Program

This three-day Interaction programme brings together a diverse lineup of speakers, including experts from TPDDL, ABB, Siemens, solar power, leading industries,. The event offers deep insights into emerging technologies, and current research trends.

Department of Electrical and Electronics

Engineering

In the year 2004, the department of EEE came into existence to cater to the requirements of Industries, both in the core sector and diverse fields where IT is used as a tool. Initially the intake was 60 which got ameliorated to 120 students when GGSIPU sanctioned seats for running evening courses as well in the year 2010. This program aims at producing engineers with sound knowledge in electronics and a strong background in electrical by imparting quality teaching, carrying out research & technology development in frontier areas of electrical & electronics engineering. The major areas of faculty expertise of the department include power systems, power electronics, advanced control systems, power quality management, soft computing, electromagnetic field theory etc. s".

Expected Outcomes

This interaction programme offers a well-rounded experience by integrating technical knowledge of experts from industry. Participants will gain valuable exposure to the latest advancements in power systems and automation,

Vision of EEE department

To nurture quality engineers, technocrats, entrepreneurs, and researchers in Electrical and Electronics Engineering, contributing to society ethically.

Mission of the Department

M1: To impart quality education in the field to meet societal needs.

M2: To inculcate competency in hardware and software for industrial applications.

M3: To provide an environment for developing aptitude and skills towards research and innovation.

M4: To create a platform for preparing entrepreneurs having ethical values and global insight.
