

Report:

On the dynamic afternoon of March 2, 2023, MAIT's Electrical and Electronics Engineering (EEE) Department ushered in a wave of innovation with the introduction of "Innovatica," an electrifying event by Electrotech. The focus of this creative rendezvous was the graphical representation of technical ideas, commencing at 12:50 p.m.

Participants, armed with technical acumen and artistic flair, took center stage, ingeniously conveying intricate technical concepts through visuals. The judging criteria, centered on graphical creativity and idea quality, added a competitive edge to the event, pushing participants to showcase the depth and originality of their presentations.

Under the expert guidance of Mr. Jitendar Kumar and the seamless coordination of Ms. Poonam Juneja and Prof. Rajveer Mittal, "Innovatica" epitomized the harmonious fusion of technical knowledge and visual artistry. The event not only celebrated innovation but also underscored the department's commitment to nurturing a holistic educational experience.

As the clock ticked away, "Innovatica" left an indelible mark, emphasizing that the marriage of technology and art yields a canvas of boundless possibilities. This event was not just a showcase but a testament to the vibrant spirit of creativity within MAIT's EEE Department, promising more exciting intersections of academia and art in the future.
