

Report:

On the morning of January 4, 2023, MAIT's Electrical and Electronics Engineering (EEE) Department, in collaboration with Electrotech, successfully hosted "DesignItOut," a UI/UX competition. Commencing at 11:30 am, the event served as a vibrant platform for students to showcase their design prowess in the realms of User Interface and User Experience.

Under the expert guidance of Mr. Rahul Garg and seamless coordination by Ms. Poonam Juneja and Prof. Rajveer Mittal, participants unleashed their creative energies, presenting innovative design concepts. The event underscored the department's commitment to fostering diverse skill development, emphasizing the importance of a well-rounded skill set in the field of Ui/Ux design.

"DesignItOut" not only celebrated the technical proficiency of the participants but also highlighted the symbiotic relationship between technology and design aesthetics. As the competition concluded, participants left with a sense of achievement, having contributed to the vibrant tapestry of creativity within MAIT's EEE Department.

The event stands as a testament to the department's dedication to providing holistic educational experiences that empower students to excel in the dynamic intersection of technology and design. "DesignItOut" was more than just a competition; it was a testament to the innovative spirit that defines MAIT's EEE Department.
